Figure 1: Regulation functions maps for the agricultural land of the case study area and indication of their uncertainties in the ordinal scale: a) mean SFF scores and b) probability that the mean SFF score of a raster cell deviates in the ordinal scale for ±1 or c) ±2 or more SFF units (raster cells 20x20m, N = 1000 simulations)
Figure 2: Habitat functions and production function maps for the agricultural land of the case study area and indication of their uncertainties in the ordinal scale: a) mean SFF scores and b) probability that the mean SFF score of a raster cell deviates in the ordinal scale for ±1 or c) ±2 or more SFF units (raster cells 20x20 m, N = 1000 simulations).
